## ROLL CALL

Commissioners Present: John Clements, Alberto Custodio, Carlos Gonzalez, Ted Tartaglia and Ron Hudson.

City Staff Present: Kevin Fabino, Community Development Director; and Frances Wiles, Administrative Assistant.

PUBLIC COMMENT: None

## CONSENT AGENDA

## 1. MINUTES OF REGULAR MEETING, FEBRUARY 7, 2013

C. Clements moved, C. Tartaglia seconded, to approve the MINUTES OF THE REGULAR MEETING OF FEBRUARY 7, 2013. Motion carried unanimously.

## WORKSHOP

## 2. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA)

Community Development Director Fabino reported that the California Environmental Quality Act (CEQA) was adopted in 1978 and several years later the National Environmental Policy Act (NEPA) was approved. NEPA is used whenever there is federal funding. For our purposes, CEQA is what is commonly used. He explained the CEQA flow chart, the key concepts, the levels of environmental analysis (is it a project; and, if so, does it require a categorical exemption, negative declaration, mitigated negative declaration or environmental impact report).

Chairman Hudson asked if the only thing that triggers CEQA is the project. Community Development Director Fabino, stated that CEQA is just a body of information. Is it a project? Is it a ministerial action? We think of a ministerial action as a requirement for a building permit. A project requires discretionary action direct or indirect when public improvements are required. Everything that comes before the Planning Commission is a discretionary action. You hear the testimony and the evidence results in you taking discretionary action. The first level of environmental analysis is a categorical exemption. With an exemption, no further analysis is required. A negative declaration requires consistency with the General Plan. If there will be environmental impacts, then mitigation measures will be applied to reduce the impacts. Mr. Fabino talked about level of significance, legal standards and CEQA myths. More discussion followed regarding CEQA.

COMMUNITY DEVELOPMENT DIRECTOR'S REPORT - None

## FUTURE AGENDA ITEMS

- Next Planning Commission meeting is scheduled on April 4, 2013.
- April, 2013 - Draft Environmental Impact Report and General Plan Update 2030 (tentative).

## ADJOURNMENT

C. Clements moved, C. Tartaglia seconded to adjourn the meeting. Motion carried unanimously. Meeting adjourned at 6:45 p.m.

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

- ☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
  - a) the significance criteria or threshold, if any, used to evaluate each question; and
  - b) the mitigation measure identified, if any, to reduce the impact to less than significance.
